

FCH & H SERIES

BAHCO
DORTMUND

CHIPPING HAMMERS SERIES FCH & H

We offer a variety of chipping hammers for different extractions. The hammers are suitable for light cleaning, stone engraving, tapping, removal of paint, rust, weld flux and small ribs on castings. The model FCH-25B offers a „blower function“, which is ideal for blowing away dirt on workpieces.

The slag hammers Series H12 have a high impact frequency for easy cleaning and putty removing works.
