## ***HYDRAULIC TORQUE WRENCH LOW PROFILE SERIES MFC***

The MFC series hydraulic torque wrench is compact, flat and slim. The design makes it perfect for height-restricted applications. The torsion retaining pawl system achieves maximum efficiency as bolt torsion is restricted with each stroke, optimising direct preload force transmission.

- High resistance with aluminium-titanium and light body
- 700 bar maximum operation pressure
- Repeatability of  $\pm 3,0\%$
- Torsion retaining ratchet system
- 360° x 180° multi-positional swivel quick release couplings
- Interchangeable cartridges with small head radius
- Suitable for continuous operation at maximum pressure
- Pressure relief valve prevents over pressure

**Dimensions and selection table**

Type	Wrench size [mm]	Torque [Nm]		Weight [kgs]	Dimensions [mm]				
		Min.	Max.		W	R	H2	H1	L
