TA13 is an air hydraulic cutting tool. The design allows the user to work using rapid strokes and considerable force. The cut is burr-free.

TA13 is available for both fixed workstations and mobile use.

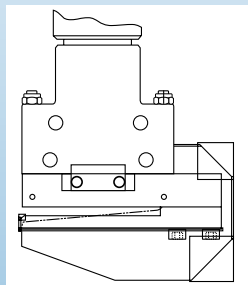

The tool is both light weight and well-balanced to minimize the strain on the

user. The air hydraulics also mean that the tool runs silently and is completely vibration-free.

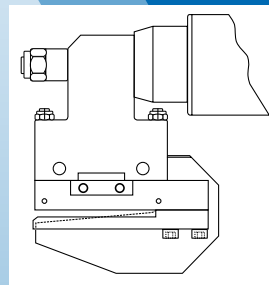

The tool has few moving parts and has an extremely high level of operational reliability.
