HYDRAULIC PULLER BUGGY SERIES AHV 50-110...

Combine your own hydraulic puller set. Choose those parts that you need and enjoy the advantages of a personalized puller set which correspond your individual needs.

- operator friendly, portable.
- serves as a full-fledged workplace.

Hydraulic pullers are heavy duty equipment. Especially with the daily use of the tools, this easily movable variant comes in handy. The pullers and accessories are always at hand in the same place. Mobility is guaranteed by 4 moving wheels under the buggy, two of them can be fixed.

The working position of the puller can be adjusted very accurately with the installed winch. The hydraulic pullers AHV 50-110 not only save time and energy, they also meet the requirements safety at work. By using the winch, the worker doesn't need to hold the puller in position during the operation.

BAHCO

■ **Customized**

Create your individual hydraulic pulling kit. Select the needed pieces and enjoy having a customized kit adapted to your personal need.

■ **Choose a complete set from our recommendations**

Choose between basic, advanced or our professional set. Each set is upgradeable with various accessories and will be delivered as standard with an air-driven pump. All sets are ready to use.
