Compact cylinders of the CJ series

are single-acting, compact cylinders in low profile design with integrated pump. The pump lever can be swivelled 360° and the relief valve is located on the cylinder housing.

available, each with a stroke of 41 mm and an overall height of 95 mm. The pistons are hard chrome-plated, the cylinders are roll-polished on the inside.

CJ compact jacks are the right choice when you need flexible cylinders in hard-to-reach places. Two power ranges of 11t and 23t are

Dimensions
