*The super flat cylinder of the CML series* is extremely flat at the same time low weight. The great advantage of these cylinders is especially evident where there is limited space or hard to reach places are available. The domed pistons allows for a slightly off-center load application.

- 6 models, 10 to 16 mm stroke
- Extremely flat design
- Light weight
- Single-acting without spring return
- Corrosion-resistant piston, galvanized housing
- Fully-duty piston stop

### Dimensions

Type	Part-No.	Cylinder-class tn	Capacity kN	Stroke mm	Dis- place- ment cm <sup>3</sup>	Piston area cm <sup>2</sup>	Dimensions in mm					Weight kgs
