The H3349 is an air-hydraulic hole punching machine. Its design offers the possibility to work powerfully and with a fast stroke. The hole punching is burr-free. The H3349 is used for punching drainage holes in the floor rail when glazing terraces and balconies.

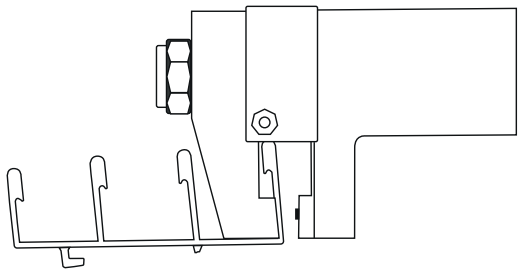

The tool is available with a punch size of 5 x 12 mm.

The tool is lightweight and well-balanced to put as little strain as possible on the user.

The air hydraulics ensure quiet and vibration-free operation.

The tool has only a few moving parts and is therefore very reliable in operation.
