

PUSH & PULL KITS

BAHCO
DORTMUND

**PUSH AND PULL KIT
UP TO 10 TONS**

BAHCO

- Flexible tool kit for various applications
- Suitable for other BAHCO equipment
- Many different accessories The 10-ton push and pull kit is available in three different makes: basic kit, standard kit and universal kit.

The choice of the appropriate kit depends on the intended use. All sets have, a 10-tons push cylinder.

Furthermore do each kit contains a one-or two-stage hand pump or an air-hydraulic foot pump.

Basis Unit

The basis kit includes all the necessary parts in order to accomplish its work. It includes a 10-ton push cylinder and hydraulic pump of your choice. Furthermore, various accessories such as extension tubes and push heads are included into the kit.

Standard Unit

The standard kit includes the same parts such as the basis kit but additionally a spreader, a rubber-coated push head,

double nipple and a supporting plate. The use of the cylinder is even more flexible. The standard kit is available with either a one-or two-stage hand pump or an air hydraulic foot pump.

Universal Kit

The Universal kit includes all parts of the basic and standard kit and a 10-ton pulling cylinder with pull chain and further fittings for the pulling cylinder.

Type description and pump selection			
Basic kit	Standard kit	Universal kit	Pump selection
EB/EBU101*	ES101	EU101	PH70A-600
EB102	ES102	EU102	PHS70-1000
–	ES103	EU103	PP70B-1000

* In EBU metal box TL 125 does not contain

PUSH AND PULL KIT UP TO 10 TONS
